

EDUCATIONAL QUALIFICATIONS

M.B.A. - Strategy and Consulting	2026 - 2028	Indian Institute of Management, Visakhapatnam	Pursuing
B.Tech. - Computer Science & Engg.	2020 - 2024	Bennett University, Greater Noida	68.1%
CBSE - 12th	2019	Jayshree Periwal High School	84.4%
CBSE - 10th	2017	Jayshree Periwal High School	87.4%

PROFESSIONAL EXPERIENCE

Financial Analyst	Shri Shyam Travels	Aug 2024 - May 2026
- Modelled contract pricing that supported turnover growth from ₹7.5 Cr. to ₹11.5 Cr. (53%) and ₹1 Cr. in annual profit for the firm. - Structured the 47-vehicle HPCL-HRRL bid at 7.5% above the client estimate through vehicle-level financial modelling in Excel. - Priced the 20-vehicle IOCL Kanpur contract 9.5% above the client rate by benchmarking rental rates and financing costs. - Built Excel financial models covering EMI schedules, fuel, maintenance, insurance and depreciation for 20 to 47+ vehicle fleets. - Lowered receivable exposure through credit analysis of client financial statements across IOCL, HPCL and ONGC accounts. - Cut long-term funding risk by aligning financing tenures to contract duration across 30 financed vehicles in the owned fleet. - Protected margins by setting profitability thresholds that screened out 15 low-price tenders before the bid submission stage. - Sharpened bid assumptions by tracking macroeconomic and interest-rate trends against capex, taxation and working capital. - Devised a hybrid execution model combining owned fleet with subcontracted partners, improving scalability and utilisation. - Advised senior management on pricing strategy, commercial negotiation and fleet expansion through structured analysis. - Benchmarked competitor pricing, rental rates and financing costs across government and PSU tenders to position each bid. - Evaluated fleets of 20 to 47+ vehicles across transport contracts, preparing profitability models and structured pricing options.		
Founder	Kesari Amritsari Kulcha	Oct 2023 - May 2024
- Exited at 2x on ₹4.5 lakh capital by scaling a quick-service restaurant to 2 branches on sustained revenue and margin growth. - Scaled monthly revenue from ₹1.75 lakh to ₹2.85 lakh (~63%) in 4 months through pricing revisions and influencer campaigns. - Reached a 10% net margin within 2-3 months, serving 100 daily orders and peaking at 250 orders (₹25,000) in a single day. - Cut packaging cost ~70% (₹8 to ₹2-3 per order) by renegotiating with 4 vendors and running tighter inventory planning cycles. - Held ~30% repeat customers by standardising recipes, service delivery and in-store experience across a 5-member team. - Instituted SOPs, workforce training and contingency processes across a 5-member operations team to steady execution. - Drove customer acquisition through SEO and hyperlocal campaigns, lifting brand visibility through the entire scale-up phase. - Grew the venture's Instagram page to ~2 lakh views by running the content calendar, reels and community engagement daily. - Tracked unit economics in Excel to set menu pricing and reorder levels, steadying daily execution through documented SOPs.		

INTERNSHIPS

Full Stack Developer Intern	Indian Oil Corporation Limited (IOCL)	Sep 2023 - Oct 2023
- Developed a web-based business application for a Fortune Global 500 PSU, improving workflow efficiency for daily operations. - Built frontend components and backend functionality, validating the build through testing, debugging and documentation. - Collaborated with technical mentors and cross-functional stakeholders to translate business needs into working modules.		
Python Developer Intern	Jaipur Metro Rail Corporation (JMRC)	Aug 2023 - Sep 2023
- Improved query performance by 25% by optimising database queries and data retrieval across the attendance data pipeline. - Engineered an AI-powered face recognition attendance system in Python and Computer Vision, improving accuracy by 15%. - Automated backend attendance workflows, cutting manual intervention through AI-driven process automation across sites.		
Business Development Intern	Flavors of Paris	Jul 2023 - Aug 2023
- Drove ~25% growth in online customer engagement through SEO, website optimisation and digital outreach with the founder. - Streamlined invoicing, documentation and administrative workflows, contributing an estimated 20% gain in daily efficiency. - Managed the company Squarespace website, improving content structure, search visibility and the overall user experience. - Designed QR-code review campaigns, increasing customer feedback collection and strengthening reputation for the brand. - Ran email marketing and promotions that improved customer retention across an international hospitality customer base.		

LIVE/ACADEMIC PROJECTS

CRED COUNSEL - MENTORSHIP PLATFORM PRODUCT STRATEGY, KOED LEARNING	Aug 2026
- Evaluated a two-sided mentorship marketplace for CRED's 15M-member base, sizing a Bengaluru pilot on the member mix. - Identified verified seniority as the only defensible moat against Topmate and ADPList for 3M senior and 6M early-career users. - Scored an 11-feature backlog on RICE under a 4-person, two-quarter constraint, cutting the mentor directory and in-app chat. - Defended one explicit RICE override where the framework under-weighted the binding supply-side constraint on the product. - Defined a North Star metric with 5 instrumented KPIs and a full quarter of OKRs, each mapped to a named tracking event. - Designed a 2-week, zero-engineering concierge test with pre-set kill thresholds of 3% opt-in and 70% session show-up rate.	
FINANCIAL MARKET ANALYSIS WITH A HYBRID CNN-RNN MODEL	Jan 2023 - May 2025
Demonstrated 86.5% accuracy, 87.4% precision, 88.2% recall, 87.8% F1-score and AUC above 0.90 against classical methods.	

- Analysed **3 global markets (S&P 500, NASDAQ-100 and EUR/USD)** through quantitative modelling and predictive analytics.
- Co-authored **2 research manuscripts** applying deep learning to financial markets, submitted to **Springer Nature journals**.
- Applied **5-fold cross-validation, Bayesian Optimisation, Grid Search and Adam Optimizer** to strengthen model robustness.
- Designed a **Hybrid CNN-RNN framework** integrating image-based feature extraction with sequential modelling of time-series.
- Transformed **OHLC** data into **Gramian Angular Field** representations, enabling models to read non-obvious market patterns.
- Evaluated results on **Accuracy, Precision, Recall, F1-Score and ROC-AUC** with significance testing to support model selection.

POSITIONS OF RESPONSIBILITY

Campus Ambassador (Remote)	Absolute Internship	Oct 2023 – Jun 2024
• Earned \$100 per enrolment through a unique tracked referral code, converting campus conversations into paid sign-ups. • Represented a Barcelona-based internship provider at university recruitment fairs, paid \$20/hour for in-person sessions. • Produced blog articles, reviews and social content published across the brand's digital platforms, newsletters and events. • Generated leads by engaging prospective participants and raising programme awareness across university student networks. • Guided applicants with first-hand internship experience, resolving queries and improving engagement in the decision cycle. • Promoted workshops, webinars and information sessions with cross-functional teams, strengthening programme visibility. • Collected participant feedback and identified opportunities to refine outreach strategy and student engagement planning.		

CERTIFICATIONS

- **12-Hour Consulting Bootcamp** (gradnext, **6 live modules**); case structuring, market sizing, case math and exhibit interpretation.
- **J.P. Morgan Software Engineering Job Simulation** (Forage); stock price data feeds and trader-facing data visualisation work.
- **BCG X GenAI and BCG Strategy Consulting Job Simulations** (Forage); financial chatbot build and client data analysis work.
- **Certified GenAI Product Management Professional (CGENAI-PMP)** by **KOED** (Aug 2026); generative AI in product management.
- **Google Digital Marketing & E-commerce Certificate**; covering SEO, SEM, email marketing, analytics and store management.
- **TensorFlow: Advanced Techniques (4 courses)** and **Natural Language Processing (3 courses)** specialisations, DeepLearning.AI.
- **PostgreSQL: Become an SQL Developer** and **CUDA Python** (NVIDIA DLI), with Codecademy **Python 3** and **Git & GitHub** courses.
- **Introduction to Intellectual Property** (UPenn, **4 courses**); trademark strategy, patent analysis and copyright dispute handling.

ACHIEVEMENTS & EXTRA-CURRICULAR ACTIVITIES

- Awarded a **25% merit scholarship** on tuition by **Bennett University**, retained across the first year of the **B.Tech** programme.
- Advanced past Round 1 of the **GRAD 3.0** case competition by **Galderma**, shortlisted among **3,280** of **26,085** national entrants.
- Tracks **Indian and global equity markets** and runs a **personal portfolio**, following earnings releases and macro developments.
- Represented a member state as a **Delegate** at **IMUN Online Conference 35.0** (2020), debating policy under UN procedure.
